Application/Control Number: 09/771,882

Art Unit: 1743

## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1 14, drawn to a combustible gas sensing element, classified in class 422, subclass 94.
- II. Claims 15 18, drawn to a process for forming a gas sensing element, classified in class 502, subclass 101.
- III. Claims 19 and 20, drawn to a method for determining the poisoning of a gas sensing element, classified in class 73, subclass 1.02.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another process having a different step order or comprising different steps, such as a single heating step.

Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for

Application/Control Number: 09/771,882

Art Unit: 1743

using the product as claimed can be practiced with another materially different product, such as a gas sensing apparatus comprising a compensating element not including a catalyst. The product as claimed does not include such a compensating element.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions have different functions. Invention II is directed to a process for forming a gas sensing element. Whereas, invention III is directed to a method for determining the poisoning of a gas sensing element.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Ira J. Schultz on 5/28/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Application/Control Number: 09/771,882

Art Unit: 1743

remaining in the application. Any amendment of inventorship must be accompanied by

a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Brian J. Sines whose telephone number is (703) 305-

0401. The examiner can normally be reached on Monday - Friday (11:30 AM - 8 PM

EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Jill A. Warden can be reached on (703) 308-4037. The fax phone numbers

for the organization where this application or proceeding is assigned are (703) 872-9310

for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is (703) 308-

0661.
